The Solution

CoPE-FBA 2.0

## Linear Program:

Maximize  $Z_{obj} = \mathbf{c}^T \mathbf{J}$

subject to,

$$\mathbf{N}\mathbf{J} = \mathbf{0}$$

$$\mathbf{J}^{min} \leq \mathbf{J} \leq \mathbf{J}^{max}$$

**N**: stoichiometric matrix

**J**: steady-state flux vector

**c**: vector of coefficients that represent the contribution of each flux in vector **J** to the objective function  $Z_{obj}$ .

# Flux Balance Analysis formulation, example

$$\text{Maximize } Z_{obj} = \mathbf{c}^T \mathbf{J} = J_{18}$$

subject to,

$$\mathbf{N}\mathbf{J} = \mathbf{0}$$

$$-\infty \leq J_r \leq \infty \quad J_r \in \text{reversible reactions}$$

$$0 \leq J_i \leq \infty \quad J_i \in \text{irreversible reactions}$$

$$0 \leq J_1 \leq 2$$
